

Journal of Veterinary Research - review of manuscript

1	Does the article contribute new and original data?
2	Does the title of the article reflect its contents?
3	Is the abstract sufficiently informative, especially when read alone?
4	Is the article properly organised and clearly presented?
5	Are the methods used adequate and appropriate in view of the subject matter?
6	Are the interpretations and conclusions justified by the data?
7	Are the figures of good quality and figures and tables clear and necessary?
8	Are the photographs of good quality?
9	Are the references adequate to the article ?
10	Suggestions for increasing the article's value.
11	Other comments.
12	Evaluation of the article on a scale from 0 to 5 points.
